

SCIENCE CITY'S

DISCOVERY LAB

Supported by
PNC
Grow Up Great

Inspiring
Great Futures
for Young
Children!

The PNC Discovery Lab is a mobile learning experience bringing high-quality, educator-led science programming directly to early education centers.

The PNC Discovery Lab will travel to early education centers and provide onsite programming by Science City educators. The Lab is spacious and fully equipped to deliver high-value, educator-led programming. It's part of a \$1 million PNC Grow Up Great® grant that supports early learning programs in underserved communities.

What to Expect:

Interactive, hands-on STEM activities for preschool-aged children.
Experienced Science City educators delivering age-appropriate lessons.

Thanks to the generous support of PNC Grow Up Great the program will be offered to centers that serve under-represented and minority populations for free.

Interested in bringing the Discovery Lab to your site?
